Flocons en papier : pliage en six branches

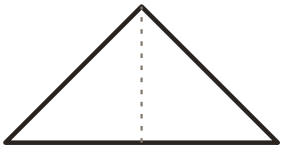

Les vrais flocons ont six branches : ce pliage les reproduit.

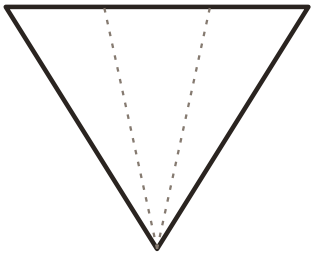

1. Un carré, plié en triangle

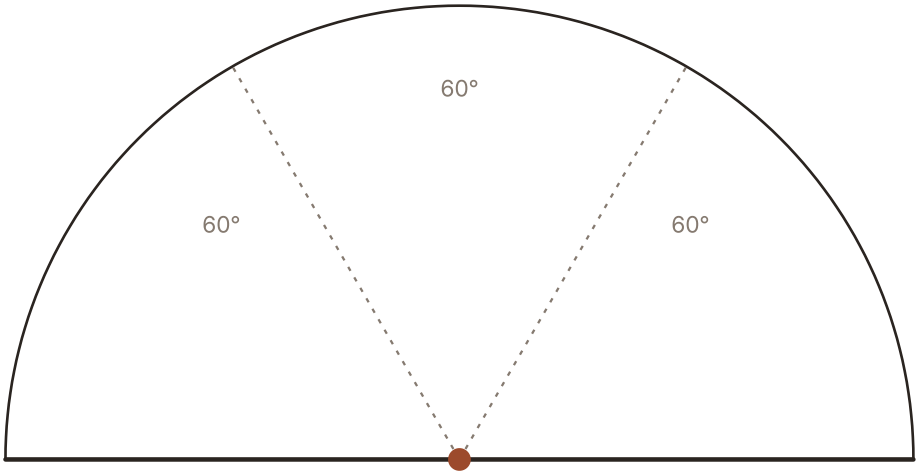

2. Encore en deux

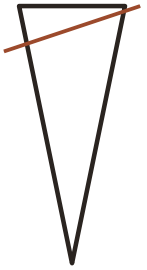

3. Repérez le milieu du pli

4. Pliez en trois (gabarit)

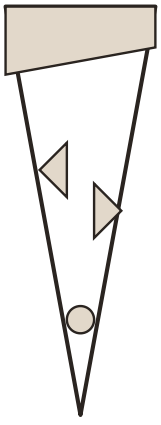

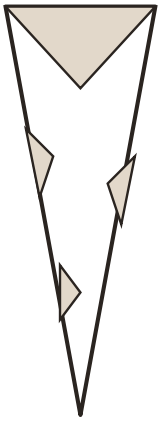

5. Coupez la pointe

Gabarit de l’étape 4 : posez le pli sur la ligne, le milieu sur le point, et rabattez sur les pointillés.

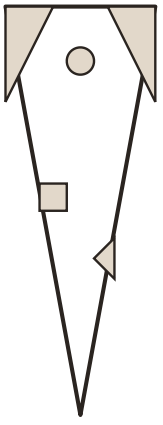

Découpez les zones grisées, en gardant toujours un morceau des deux bords pliés.

Modèle Étoile

Modèle Cristal

Modèle Dentelle
